========== 07/07, Sprint 2 ===============

Team members present:

- Nguyễn Hoàng Đức Nguyên
- Nguyễn Đắc Khôi
- Trần Văn Quyết
- Dương Phước Sang

Sprint 3 Tasks:

- Define Software Architecture: Software architecture for a website encompasses the high-level design and organization of components, communication, and data management. It defines the structure and interactions to create a robust and scalable web application.
- Research connection method: We need to understand about the connection between server and client, and how to maintain it, and limit error occurrences.
- Research websites which have attractive and simple UI: We need to further research high-rated e-commerce websites to study their interfaces.
- Continue learning JS: This is a work all members have to do.

Assign sprint 3 Tasks:

- Define Software Architecture: Dương Phước Sang
- Research websites with good UI: Nguyễn Hoàng Đức Nguyên
- Research connection method: Nguyễn Đắc Khôi
- Learn how to connect database with project: Trần Văn Quyết
