3. Introduction:

We want to build a website for a coffee shop, we found that drinks and coffee are the favorites of most people nowadays, and so are we. Some of us have worked as coffee sellers in a coffee shop, so we have a little bit of experience in selling coffee and some other services related to drinks.

4. Target users and environments:

The users are web shoppers, customers who use drinks at the cafe or buy to takeaway, shop owner and salesman.

Environment is web for devices which can access to the internet.

5. Key features:

- Search drinks by name
- View detail of a drink (recipe, ingredient)
- Add/ Delete drinks
- Show available products in the collection.
- Buy drinks online.
- Custom drinks according to customer preferences
- Gift wrapping service for some afters of shop like cake, candy, …

- Caculate total price in the cart
